

ALLEN & OVERY

Environmental, Social and Governance (ESG)

Managing risks and enhancing value | 2021

Introduction

Allen & Overy is a market leader in ESG, with extensive experience advising corporates, private equity sponsors, investors, lenders and portfolio companies on the full spectrum of compliance matters across the life-cycle of a project. The combination of our multi-jurisdictional M&A, leveraged finance, high yield, securitisation and investment funds expertise is supported by a full range of complimentary practices including environmental law, business and human rights, sustainable finance, corporate governance, employment, data protection, cyber security, dispute resolution and litigation, and Consulting Services. This expertise, when combined with our strong sector focus, makes us stand out in the market.

We are one of few firms able to provide a fully integrated offering across products and sectors and to advise on all aspects of a transaction. Our offering is truly global. Our extensive network of offices covers each of the key financial markets across the world, enabling us to give specialist advice to clients wherever and whenever it is required.

ESG is good business

A growing body of empirical evidence shows that sustainable investment goals can be aligned with – and can advance – financial objectives. When a company performs well on ESG criteria, it is often a key indicator that it is well managed overall, prepared to manage volatility and likely to perform better financially over time. Thus ESG characteristics are increasingly used to assess the financial soundness of funds and companies, as well as how prepared or ‘resilient’ those investments are to longer-term challenges. Some socially responsible investors also want to use their wealth to further sustainable development goals and make a positive impact.

We can enable you to take advantage of such ESG-related business opportunities by helping you find ways to integrate ESG factors into your due diligence practices, portfolio analysis and investment decisions; design and roll out financial products that have a positive social or environmental impact; and monitor and report on your successes in a manner that meets regulatory requirements.

ESG is good legal practice

Legal risk mitigation objectives and sustainable investment strategies also go hand in hand. It is now common ground that investors’ duties around the world not only permit, but increasingly require investors to embed ESG factors into investment processes. New regulatory risks also are emerging for investors and financial institutions, as governments respond to the international commitments States have made to address adverse ESG impacts – including with respect to climate change – by companies within their jurisdiction. Governments are employing ESG regulatory techniques that increase the legal, as well as reputational and financial risks, for businesses that fail to manage ESG issues effectively and for their investors and financial services providers.

Private actors also are deploying a diverse array of litigation strategies regarding ESG issues, including against company directors and financial institutions.

We can provide you with a map of this treacherous terrain and help you find ways to identify risks across your portfolio; avoid involvement in adverse ESG impacts; assess the ESG related credit and other risks of your potential clients; gain a competitive advantage as regulation and litigation develops; design and roll out compliance processes and contractual mechanisms to mitigate risks; and obtain assurance and develop reports on your ESG performance.

ESG involves complex challenges

ESG is increasingly becoming a complex form of corporate governance involving significant legal issues. As the framework becomes underpinned by legal requirements, advice is required to head off the risks and take advantage of the opportunities this new investment environment presents.

We recognize that different clients are at different stages with respect to ESG issues, and are confronting different ESG issues; therefore we tailor our advice accordingly.

Achieving your sustainable investment goals

We can provide you with practical advice to implement ESG considerations across your investments and help you meet your sustainable investment goals. While approaches to ESG vary depending on the particular asset class and its corresponding risks and opportunities, a few high-level ESG approaches apply across equities, fixed income, private equity, hedge funds, infrastructure investment, real estate and other investments and asset classes:

- Integration: looking at investment decisions in a wider context than traditional financial analysis and including analysis of a range of risks and opportunities related to ESG drivers.
- Active ownership and voting: actively engaging with the managers and boards of directors of investee companies on business strategy and execution, including specific sustainability issues and policies.

- Negative and positive screening: incorporating an investor’s principles by excluding or involving companies involved in certain activities or industries.
- Thematic: focusing on specific trends and themes such as human rights, the environment, diversity or demographics.
- ESG governance: ensuring that internal risk governance systems are capable of fully understanding and mitigating ESG risks.
- Engagement with portfolio companies: implementing meaningful ESG programs (including KPIs) into the day-to-day operations of your portfolio investments.
- Devising sustainable investments, such as social impact or green loans.

Achieving your sustainable finance goals

Allen & Overy has extensive experience of working with clients in both the private and public sectors on sustainable financing, from corporate green loans or bonds and sustainable supply chain financing, to financing renewable projects.

Management of reputational risk is currently a key driver for most clients but regulatory changes will be transformational for the market when they come into force. Certain borrowers may be required to disclose information on sustainability issues as part of their annual non-financial reporting obligations.

Across the sustainable bond and more nascent sustainable loan markets, Allen & Overy can navigate you through this fast-changing market and its evolving standards.

Through our international network of lawyers we have the depth of resources to help our clients, wherever they are in the world, achieve their commercial aims across the sector.

How can we help?

We want to prepare our clients for the next step in the ESG evolution – enabling them to stay one step ahead and navigate the ever-changing ESG landscape. We also see significant opportunities for those clients who are adapting to these new challenges.

To help clients, Allen & Overy brings together global expertise in specialist practice areas in Environmental Law, Business and Human Rights, Sustainable Finance, Corporate Governance, Employee Engagement, Data Protection and Cybersecurity, Dispute Resolution and Litigation, as well as Consulting Services to assist our clients on the full range of ESG matters.

Examples of A&O advisory support to mitigate ESG risk and capitalize on ESG opportunities:

Risk management & strategy

- Assist in developing ESG policies and practices
- Draft ESG management plans and codes of conduct for projects and transactions
- Design bespoke contractual mechanisms and dispute resolution clauses to permit leverage and exit
- Advise Board and C-Suite on regulatory landscape and litigation risks

Due Diligence

- Scan transactions and lending to identify potential ESG impacts throughout value/supply chain
- Conduct structured ESG due diligence and impact assessments on high-risk projects, transactions and lending

Reporting

- Assess effectiveness of responses to ESG impacts, provide metrics and analysis, and design alternative strategies
- Draft strategic reports, sustainability and modern slavery reports

Dispute resolution

- Design grievance mechanisms as early warning systems and remediation processes
- Dispute resolution: we represent clients before courts and tribunals, where they face claims involving alleged environmental, social and governance abuses

Sustainable finance

- Advise on all aspects of sustainable finance, from corporate green loans or bonds and sustainable supply chain financing, to financing renewable energy projects
- Develop standards for products such as green or social impact bonds and loans
- Develop workable solutions for new circular business models, including Product-as-a-Service (PaaS) models

goran.galic@allenoverly.com

Goran is an energy and resources and projects specialist. He advises across all aspects of the ‘pit to port’ spectrum within the mining and petroleum sectors including on project acquisition, joint ventures, project development and infrastructure construction, operations and services arrangements and offtake. He has been involved with some of Australia’s largest mining and LNG projects and brings significant experience in resources projects globally, including with amongst the world’s first FLNG developments.

Additionally, Goran advises on regulatory aspects of energy and resources projects in Australia, including in respect of environmental approvals and compliance. He brings considerable expertise in environmental and social compliance, including in the application of IFC Performance Standards and Equator Principles, in the context of significant LNG and mining projects in non-OECD jurisdictions.

Goran is sought for his deep sector expertise and solutions focussed approach. He was named in “Best Lawyers” for “Natural Resources Law” in 2018 and 2019 and is recognised in ‘Energy and Natural Resources’ by the Legal 500 2019.
